INSTALLATION

INSTALLATIONS MUST MEET APPLICABLE SECTIONS OF TITLE 33, PART 183; SUBPART K, USCG VENTILATION REGULATIONS.

FLANGEMOUNT MOUNTING

Mount blower on flat bulkhead surface in highest part of compartment free from spray or deck wash. Cut a 3-5/8" hole in bulkhead and secure blower with washers and No. 10 screws (NOTICE: Tighten screws evenly to avoid flange damage). Use a suitable discharge fitting so that static pressure of blower will not be affected by change in wind direction. Route inlet ducting with as few bends as possible to lower 1/3 of the bilge compartment where vapors are likely to accumulate. Be sure ducting is positioned below top of engine stringers but not so low as to become submerged in bilge water. Locate pickup to take advantage of natural air flow direction.

FLEXMOUNT MOUNTING

Mount blower on flat bulkhead surface in highest part of compartment free from spray or deck wash. Blower may be rotated in mounting bracket to facilitate the shortest route of ducting. Use a suitable discharge fitting so that static pressure of blower will not be affected by change in wind direction. Route inlet ducting with as few bends as possible to lower 1/3 of the bilge compartment where vapors are likely to accumulate. Be sure ducting is positioned below top of engine stringers but not so low as to become submerged in bilge water. Locate pickup to take advantage of natural air flow direction.

NOTICE: Blowers should be mounted away from extreme heat (more than 130°F) to prevent distortion of blower wheel or housing.

OPERATION: See following warning placard statement:

WARNING	Explosion hazard. Gasoline vapors can explode. Before starting engine, operate blower for 4 minutes and check engine compartment bilge for gasoline vapors. Run blower below cruising speed. Failure to do so can result in injury or death.
----------------	---

THE "WARNING" PLACARD SUPPLIED WITH BLOWER MUST BE MOUNTED ADJACENT TO ENGINE IGNITION SWITCHES (ALL LOCATIONS) TO COMPLY WITH TITLE 33, PART 183; SUBPART K, USCG VENTILATION REGULATIONS. *

*Additional warning placards are available from factory by requesting form 43003-0418.

WIRING:

Use stranded copper wire. For lengths up to 25 feet (7,6 m) from power source: Use 12 gauge wire for 12 volt and 14 gauge wire for 24 volt. Use larger wire for longer lengths. Use a 10 amp rated on-off switch in positive side of circuit (Model 44960-0002). Circuit must be protected with a fuse. Suggested fuse sizes are listed in the specification table.
